

Meridian Robotics — AI Internship Program Handbook

Cohort: Winter 2026 | Document Version 3.1 | Confidential — Internal Use

1. Program Overview

The Meridian Robotics AI Internship Program is a 5-month placement based at the Alden Valley Fabrication Campus. Interns are assigned to one of three tracks: Perception Systems, Applied Robotics Control, or Generative Tooling. Each intern reports to a Track Lead and is paired with a dedicated mentor for the duration of the program.

2. Key Dates and Logistics

Item	Detail
Program start date	March 2, 2026
Program end date	August 1, 2026
Onboarding week	March 2 – March 6, 2026 (mandatory, on-site)
Monthly stipend	€2,450 gross
Relocation allowance	€900 one-time, paid in month 1
Standard working hours	37.5 hours/week, core hours 10:00–16:00
Mid-program review	Week of May 18, 2026
Final presentation	July 28, 2026

3. Track Leads

Track	Track Lead	Team Size
Perception Systems	Dr. Ilana Foss	6 interns
Applied Robotics Control	Marcus Oyelaran	4 interns
Generative Tooling	Priya Nandakumar	5 interns

4. Equipment Policy

Each intern is issued a laptop (16-inch, 64GB RAM) and, for Perception Systems and Applied Robotics Control tracks only, a benchtop sensor kit including a stereo depth camera and an IMU breakout board. Generative Tooling interns instead receive cloud GPU credits: 400 hours on an A100-class instance, allocated at program start and non-transferable between interns.

5. Evaluation Criteria

Interns are evaluated on three axes at the mid-program review: technical execution, communication clarity, and independence of problem-solving. A passing mid-program review is required to remain in the program through the final two months. Final presentations are scored by a panel of three Track Leads plus one external reviewer not affiliated with Meridian Robotics.

6. Return Offer Policy

Return offers, where extended, are communicated no later than two weeks after the final presentation date. Return offers are contingent on both a passing mid-program review and a completed final project demo; there is no guaranteed conversion rate and Meridian Robotics does not publish acceptance statistics for the program.

7. Contact

Program coordination questions should be directed to the Internship Coordination Office at internships@meridianrobotics.example, not to individual Track Leads.
