

Aurora Cloud Storage — Service Plans & Support Policy

Document Version 2.2 | Effective Date: March 1, 2026 | Public

1. Service Plan Overview

Aurora Cloud Storage offers three subscription tiers: Starter, Professional, and Enterprise. All plans include end-to-end AES-256 encryption at rest and TLS 1.3 in transit. Plan changes take effect at the start of the next billing cycle.

Plan	Monthly Price	Storage Limit	Max Devices
Starter	\$4.99	100 GB	2
Professional	\$12.99	1 TB	5
Enterprise	\$49.99	10 TB	Unlimited

2. Support Response Times

Starter plan support requests are answered within 48 business hours via email only. Professional plan support requests receive a first response within 8 business hours, via email or live chat. Enterprise plan customers receive a first response within 1 business hour, 24/7, via a dedicated account manager and phone support.

3. Refund Policy

New subscriptions are eligible for a full refund within 14 calendar days of purchase, provided fewer than 10 GB of data have been uploaded. Refunds are not available for renewal charges or plan upgrades after the initial 14-day window. Refund requests are processed within 5 to 7 business days back to the original payment method.

4. Data Retention After Cancellation

When a subscription is cancelled, account data is retained in a read-only recovery state for 30 days, during which the account can be reactivated with no data loss. After 30 days, all stored data is permanently and irreversibly deleted from Aurora's servers within 72 hours.

5. Account Transfers

Aurora Cloud Storage accounts, including all stored data and billing history, may be transferred to a new account owner by submitting a Transfer Request Form. Transfers require identity verification from both parties and are completed within 10 business days at no additional cost.

6. Contact

General billing and account questions: billing@aurorastorage.example. Enterprise sales inquiries: enterprise@aurorastorage.example. Security vulnerability reports should be sent to

security@aurorastorage.example and are not handled by general support.
